Handheld US Introduces M3 Mobile Rugged Handheld Computer

Rugged mobile computer with a host of integrated features now available for shipping

CORVALLIS, Ore.—May 20, 2008—Handheld US introduces the new super slim, rugged M3 Mobile PDA. The full-featured PDA comes with numerous advanced features such as integrated barcode scanner, WLAN, Bluetooth, camera, GSM/EDGE cellular capabilities, and GPS. The M3 Mobile weighs only 250 grams, is IP64 rated and can also handle extreme temperatures and multiple drops from 5 feet (1.5 meters).

The M3 Mobile comes standard with 128 MB RAM and 128 MB built-in Flash storage (expandable up to 512 MB). The M3 Mobile also has an SD slot for memory expansion. The transreflective color display has a touchscreen and the ergonomic keypad is backlit and easy to use in tough environments. To enhance your mobility, the M3 Mobile provides a rechargeable, hot-swappable Lithium Polymer battery.

M3 Mobile is built on the Windows Mobile 5.0 platform with a powerful Intel X-scale 520 MHz processor. With real-time processing, faster performance, rich multimedia and Web browsing capabilities, your enterprise can become truly mobile.

With GSM/EDGE, the M3 Mobile offers flexible voice and data communication in the easy to use Windows Mobile Phone edition. The unit also has fully integrated Bluetooth and 802.11b/g WLAN which make it easy to exchange data and synchronize with other devices. The integrated 2 mega-pixel camera with LED flash is both user-friendly and takes high quality pictures. And built-in GPS is useful for navigation or gathering location-based information. The integrated high quality laser scanner reads all common barcodes and a 2-D imager is available as an option.

“The M3 Mobile hits that critical spot where ruggedness, compact size and weight, and integrated features converge,” said Dale Kyle, president of Handheld US. “Many devices force you to compromise on at least one of those items. The M3 Mobile is the perfect tool for the mobile professional that needs to bring critical data into the field or capture it while on the go.”

The M3 Mobile is available immediately.
